(54) Title: PUSH-TO-TALK INTERWORKING

WO 2005/025255 A1

²: Optional components

(55) Abstract: The invention relates to a method and system for operating a push-to-talk communication between a PoC-group consisting of at least one member of a first communication network and a PoC-group consisting of at least one member of a second communication network, using a PoC application server in each communication network. The invention is characterised by the steps of connecting the members of the PoC-group of the first network operator with the members of the PoC-group of the second network operator, and synchronising the PoC application servers to each other.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
